ZEROFOX
SUMMARY

ZeroFOX protects modern organizations from dynamic security, brand and physical risks across social, mobile, web and collaboration platforms. Using diverse data sources and artificial intelligence-based analysis, the ZeroFOX Platform identifies and remediates targeted phishing attacks, credential compromise, data exfiltration, brand hijacking, executive and location threats, and more. The patented ZeroFOX SaaS technology processes and protects millions of posts, messages and accounts daily across the social and digital landscape, spanning LinkedIn, Facebook, Slack, Twitter, HipChat, Instagram, Pastebin, YouTube, mobile app stores, the deep & dark web, domains, and more.

RELEVANT TERMS

Alert A threat identified by the ZeroFOX Platform for content that violates a rule.

Rule A set of criteria that the ZeroFOX Platform uses to evaluate content. If the content violates the criteria established by the rule, an alert is triggered.

Policy A group of rules that trigger alerts for an entity.

Risk Rating An alert classification based on severity or potential impact. Risk Ratings are labels and do not impact how ZeroFOX generates alerts. ZeroFOX applies Risk Ratings to each rule or rule group within a policy. To start generating alerts for a particular rule or rule group, change the Risk Rating from "Off" to "Critical," "High," "Medium," "Low," or "Info."

Entity A person, place, event, or brand configured for protection in the ZeroFOX Platform. Keywords, images, and domains comprise entities and are used by the ZeroFOX Platform to collect relevant social and digital data.

Takedown The act of removing content, profiles, or pages from social and digital channels. Takedowns are always subject to each social network's Terms of Service agreement and the removal processing time varies by network.

Perpetrator The profile of a user associated with the offending content of an alert.
